Marikina City, Metro Manila

Results-driven IT Professional with experience in software engineering, systems administration, IT operations, and application support. Proven track record of developing enterprise web and mobile applications, administering business-critical systems, deploying production mobile applications, and providing technical support across multiple organizations. Skilled in REST API integration, UI/UX development, mobile application deployment, and cross-functional collaboration. Passionate about leveraging technology to improve operational efficiency, system reliability, and user experience.

Professional Experience

NextApp Solutions Corp. - Marikina, Philippines

Jan 2024 - Present

Front-end Software Engineer | Technical Support

- Designed and developed responsive, user-centric web and mobile application interfaces for multiple enterprise clients, delivering solutions aligned with business requirements and brand guidelines.
- Led front-end development of the IAM Wallet application for IAMWORLDWIDE Corporation, implementing secure digital wallet features including bill payments, mobile load purchases, commission withdrawals, and account management.
- Developed the IAM Mobile application, enabling members to track commissions, register new members, manage accounts, and perform encashment transactions through an intuitive user experience.
- Contributed to the development of the IAM ECOM mobile application by implementing front-end features, integrating RESTful APIs, and collaborating with back-end developers to deliver a seamless e-commerce experience.
- Redesigned and redeveloped the IAM ECOM website based on the mobile application's design and functionality, ensuring a consistent cross-platform user experience while integrating APIs and responsive front-end features.
- Built scalable front-end architectures for enterprise member portals and dashboard systems for multiple clients, including Nanucell, World Premier, Crown Fortune, and Blooms Wellness, implementing responsive UI, API integrations, reusable components, and client-side validation.
- Collaborated closely with back-end developers, UI/UX designers, project managers, and stakeholders to deliver high-quality, production-ready applications that met client objectives and timelines.
- Optimized applications for performance, accessibility, cross-browser compatibility, and mobile responsiveness to provide a consistent user experience across devices.
- Provided ongoing application maintenance, feature enhancements, bug fixes, and production support for retainer clients, ensuring system reliability, rapid issue resolution, and continuous delivery of client-requested improvements.
- Served as an on-call technical support resource, troubleshooting production issues, deploying application updates, and maintaining stable, high-availability environments for multiple client applications.

IAMWORLDWIDE Corporation - San Juan, Philippines

Feb 2024 - Present

IT Specialist | Systems Administrator

- Managed day-to-day IT operations, ensuring the stability, availability, and performance of the organization's systems and technology infrastructure.
- Served as the primary technical liaison between IAMWORLDWIDE Corporation and the external software development team at NextApp Solutions Corp., coordinating system enhancements, issue resolution, and project requirements.
- Administered and maintained the company's website, performing content updates, feature improvements, and routine maintenance to ensure optimal performance.
- Provided technical support for employees by troubleshooting hardware, software, networking, printers, and workstation issues, minimizing operational downtime.
- Monitored and maintained the organization's digital queuing system, proactively resolving issues to ensure uninterrupted business operations.
- Assisted in maintaining IT infrastructure through hardware and software deployment, upgrades, preventive maintenance, and system troubleshooting.
- Oversaw the development and continuous enhancement of key business applications, including the Member Dashboard, IAM Wallet, and IAM ECOM, collaborating with developers to ensure alignment with business objectives and user requirements.
- Managed the complete mobile application release lifecycle using Google Play Console and Apple App Store Connect, coordinating internal testing, closed and open beta releases, production deployments, and post-release updates.
- Collaborated with cross-functional teams and external vendors to implement new features, resolve production issues, and improve the reliability and usability of business-critical systems.

Nanusci Inc. - Subic, Zambales, Philippines

Feb 2024 - Jun 2025

Freelance Graphics Designer

- Designed promotional graphics for Nanusci Inc.'s health products for use across social media platforms.
- Created marketing materials such as banners and flyers for company events and public promotions.

- Developed the official logo for NanuHealthShop, a sister company of Nanusci Inc.
- Produced initial product packaging and branding concepts for NanuHealthShop's product line.
- Designed daily social media graphics for Nanucell, another sister company, from December to May, maintaining consistent brand visuals and messaging.
- Collaborated closely with the marketing team to ensure all materials aligned with brand identity and campaign goals.

Ad2Kart - Manila, Philippines

Dec 2022 - Feb 2024

IT Staff/System Administrator | Creatives Graphic Designer

- Managed social media content on various platforms eg. Facebook & Instagram.
- Created graphics and posters for marketing and advertising.
- Implemented the use of the POS system for the related staff to use.
- Created accounts and taught the staff on how to utilize the system.
- Supported and supervised the staff until they were proficient in using the system.

PluggedIn - Quezon City, Philippines

Jul 2022 - Oct 2022

IT Intern

- Supported the team on the execution of the e-commerce platform and the establishment of the system.
- Assisted the Human Resources manager in creating a more developed, organized, and structured work organization.
- Implementation of the system and the e-commerce platform in the company.
